

Datum's TekCart™ PRIME cart provides more capacity in a smaller footprint than competitor carts and incorporates Datum's exclusive Intellepower™ Smart Timer. This innovation in device charging technology enhances efficiency and time management efforts.

The Intellepower™ Smart Timer uses current-sensing technology to test each power strip for AMP draw and determines which of the power strips can provide charge simultaneously. It will continue to monitor the power draw throughout charging until all devices can be charged at once. The Intellepower™ Smart Timer will automatically shut off once the devices no longer require a charge.
