

HIGH-DENSITY STORAGE COLD STORAGE

Cold Storage is expensive. Construction costs per sq. ft. for a temperature-controlled facility can be as much as triple the cost of constructing a traditional warehouse, and cold storage warehouses have one of the highest electric energy usage volumes in the commercial building sector.

Therefore, maximizing your space and decreasing energy inefficiencies is crucial to save money and increase profits.

Datum's MobileTrak[®] High-Density Storage Systems:

- Create a space where inventory is visible and quickly accessible, reducing retrieval time and increasing energy efficiency.
- Double storage capacity without expensive renovations or off-site storage, which can interrupt productivity.
- Maximize the capacity of the space and help maintain temperatures by reducing the air that escapes when the area is accessed, reducing energy costs.

Optional Features:

- Metal crank handle to withstand below-freezing temperatures
- Galvanized steel decking and carriage to decrease moisture retention
- Stainless steel tracks and wheels to prevent rust
- Can be configured for use in temperatures down to -25 degrees Fahrenheit

Speak with your Datum Specialist today to learn more about Datum's lines of storage solutions:

- High-Density Storage
- Shelving and Filing Systems
- Weapon Storage
- Desks and Workstations
- Lockers
- Store & Charge

EXPERIENCE. SERVICE. COMMITMENT.

Owned and operated by the Potter family since 1968, Datum's team of in-house engineers, designers, and skilled craftsmen has manufactured storage solutions for over 40,000 companies around the world. Datum's diverse lines of products are made in York, Pennsylvania with high-quality, environmentally friendly materials and processes. Every product is backed by Datum's exclusive Lifetime Warranty - the best in the industry.
